

MICHELIN® LTX® M/S

Large, stable contact patch maximizes the stability of the tread blocks for longer tire life.

Deep circumferential grooves channel water out from under the contact patch for exceptional wet traction.

Unique tread block pattern minimizes noise for a quiet ride.

Interlocking, full-depth sipes provide many biting edges for excellent snow traction while still maintaining tread block stability for enhanced cornering.

Third steel belt in D & E load ranges provides greater puncture resistance for greater durability.

Special tread rubber compound helps the tire maintain excellent grip in all weather conditions.

State-of-the-art casing distributes stresses more evenly for longer tread life.

Bold, new sidewall styling for an attractive sporty look.
